Volume 256, April 1989 Volume 25, April 1989

Page H1194: K. D. Massey and K. P. Burton. "α-Tocopherol attenuates myocardial membrane-related alterations resulting from ischemia and reperfusion." The second sentence under RESULTS, Tocopherol levels, should read: "Tissue tocopherol levels were $20.2 \pm 1.6 \ \mu \text{g/g}$ wet tissue (n=9) in nontreated controls compared with $30.4 \pm 0.8 \ \mu \text{g/g}$ wet tissue (n=11) in vitamin E pellet-treated hearts (P < 0.001)"

Volume 258, April 1990 Volume 27, April 1990

Page H1175: T. M. Griffith and D. H. Edwards. "Myogenic autoregulation of flow may be inversely related to endothelium-derived relaxing factor activity." In Fig. 4, the correct values of conductance are exactly ½100 smaller than those originally shown. In the second and third line of the left-hand column, the unit of incremental conductance is mmHg⁻¹, not mmHg·min·ml⁻¹.
